

Kitchen Remodel Checklist

Before contacting a contractor or designer about your remodeling project, you should review the following checklist. A typical kitchen remodel takes about 6 to 8 weeks, depending on complexity. This checklist includes the most common elements of a kitchen remodel. If you think about these elements in advance, your designer and/or contractor will be able to design and quote your project within your budget and give you a realistic timeframe for your project. Fill out as much information as you can.
